

First, I would like to know why it takes a tragedy to happen in the suburbs before there is a big huge outcry for civil justice. That kind of special attention on one specific community troubles me. As far as Mental Health issues, far too much research is conducted on "Caucasian" children then applied to all children when it comes to diagnosis regardless of their race. That's not right.

- There are massive crimes in the big inner cities daily that peaked in the late 1980s and not once have you convened or gave special legislative attention to develop ways to reduce the horrific crimes that occur daily in Urban Communities. Is it because the folks in the suburbs are privileged? Or are they considered normal and just people?

- You can't legislate to reduce crime. These crimes are out of your control, police's control, state trooper's control, DPS control period.

- Although I voted for President Obama and I love him dearly, but he did you an "injustice" towards your Legislative Careers as far as ordering and/or advising you to legislate "gun control" as it pertains to folks with MH issues. First, we have enough gun control laws. We don't need more legislation. "We need help" to reduce crime in the "Urban Community".

- The laws that you legislate to reduce crime in the suburbs will not work in the big inner cities. OR is this legislative session just to help the suburbs diminish crimes in their community? Several African American children/teenagers are constantly diagnosed with ADHD, Personality Disorder, and BiPolar Disorder. More specifically, black male and females released from prison and they've been untreated since birth. So now this means that they will continue to be totally out-of-control in their communities. In fact, someone is being assassinated right now as we speak. But you won't see people from the media running around with multiple cameras, nor have we ever seen a president descend on Air-Force in the Urban Community!

- If you are truly looking to reduce crime in the inner-cities and you want it work, as representatives for our communities I believe you should be honest with the President and let him know that you need help.

- There is war that's been going on in the urban community since the late 1980's up to and including this date. The last I checked, only Congress can declare war

- There is an outcry that our military troops need jobs to come home too. Great, because they need to be disbursed in the urban communities. Because they are the one's trained to reduce crime. For example, they are of great assistance in countries like Bengazi, Afganistan, Iraq, etc.

•I am demanding that you request federal help from the president to end the war in the Urban Community.

•Effective tomorrow, your phones, emails, and your small committee meetings and this building will be filled with African Americans and Latinos who were diagnosed and misdiagnosed arranging from ADHD to Bipolar demanding your help to reduce violent crimes in the urban community until this legislative session is over in June 2013.

•Perhaps, President Obama will make special flight arrangement to descend on Air Force One in the Urban Communities on your behalf.

•It is very disturbing to see how you've paid so much attention to the crime that took place in Newtown. Little innocent black children get killed daily. You never show your concern or help express your sincere condolences in the Urban Community.

•Black and White children are different. They are raised in totally different environments. They see different things every day. Black children live in high crime areas and we never know which one of our children are going to be killed by guns when they are on their way to school or the penny candy store. You never show your concern. You have ignored our crimes since the 1980's when they peaked up to and including this date.
