

To whom it may concern,

The tragedy at Sandy Hook Elementary school was horrendous, what happened on that day is truly every parents worst nightmare. I am a father of one daughter and have another daughter due in 11 weeks, that being said, lets not jump into any hasty decisions regarding gun control. The terrorist that performed these actions was not concerned with the laws that this state already had on it's books, and if there were stricter laws it still would not have affected his choice to kill innocent children. By rushing these changes of ours laws (which are already some of the strictest in the nation), we are only changing the balance of power to favor those already breaking the law. I am a firearms instructor as well as an avid sportsman, and bringing about these changes does nothing but weaken the law abiding citizens ability to defend home and family. I appreciate all of the concern that you have for our lives as citizens, but for all of our sake please do not make this a more unsafe state by enacting these laws.

Brian B.
