I am in my 3rd year free from klonopin which was given to me for some situational anxiety I had many years ago. It was only supposed to be prescribed for 4 weeks at the most and I ended up being on it for about 7 years. It caused serious damage to my central nervous system and caused over 200 symptoms that haven't fully healed. Doctor's denied my symptoms for years. Took me 3 years in painful withdrawal before finding a doctor that knows about this problem. A total of 10 years of my life is gone

Not what Micheal presents in his documentary Bowling for Columbine... Instead, he goes and puts the blame on a gun maker! That's the conclusion to his movie! Here he is asking the correct questions.
