

Hi In the interest of all citizens and the security of our school children nation wide, mental health programs should be initiated to help stem the unbalanced from going so far as to commit the atrocities of late. The media seems to pronounce the cause is the use of certain types of rifles and 30 round magazines. The media fails the American public by not addressing the real cause. When someone drives an auto into a crowd of pedestrians or into a public area killing a number of people, the media doesn't suggest it was the car that caused the event. When someone leaves a bar intoxicated jumps into his/her car, gets into an accident killing the other driver and possibly passengers, the media doesn't demand outlawing liquor. Why is it then the media and politicians are demanding the ban on the gun rather than point to the real problem which is an unbalanced individual. In this case as others he used a gun rather than an car. My phone is 860-289-1001. Richard Carabillo
