Good Morning~

My name is Donna Berndt and although I live in Massachusetts I have bought puppies from The Dog House in Connecticut. I visited their store many times before doing so however. Every time I went to the store I found the employees to be very nice. They not only feed the puppies, clean their kennels, talk to the puppies, etc. etc. They take them out and play with them constantly. If they think a puppy needs extra attention, the employees will take the puppy home and foster care them for a while. What other company would do that? They genuinely love animals~

Also, they find homes for pets that have been surrendered by owners that cannot care for their pets anymore due to job loss or moving and not being able to take their pets. They also do adoptions!

I realize some pet stores are only in the business for the money, but please do not clump all stores into one group!!!!!!!

Thank you!
