Subject: dog breeders

Hello my name is Hollie a very close friend of mine recently purchased a puppy at 4 weeks old from a breeder who said he was running a business that was supposedly legal come to find out its not he has a bunch of dogs in crates that he uses for breeding and then they become throw away dogs and they are taking the puppies from their mothers way to young now the puppy she has is on her death bed and has some pretty serious medical problems that will never go away if she survives....moral of the story is if the pet shops get closed down this is exactly what will continue to happen in the state of connecticut....where are people suppose to get dogs from????
