Message Body:
Task Force,

My family just had a wonderful experience purchasing a dog from a Pet & Supply Store. we went against all of the conventional thinking and misinformation given us before we tried to get a dog. All Pets was very helpful with every aspect of our purchase to include warnings about possible diseases that "puppy mill" pets can sometimes acquire. It was this information which surprised our Veterinarian the most. This forthcoming behavior help our Vet with all of the supplied documentation to have a healthy pet after one visit. Now I say don't believe all bad things you read/ hear.

PLEASE REGULATE, DON'T ELIMINATE

Craig Byrd
