

1 - get rid of at least half of the state employees - that will let the remainder good ones do their job faster and better

2 - get rid of the the union kickbacks to poor and lazy road builders with political ties who build bridges that are torn down in 25 years etc - or buying buildings that are known defective - spending huge amounts of money on them only to be torn down = going to spend millions on remodeling when it is better to tear down and start new

3 - stop overbuilding roads and bridges when simpler and better systems can be built
- example the mess in East Hartford by CT river

4 - get rid of commissioners of departments who not only don't know a thing but get huge salaries for nothing

5 - get rid of 3/4 of the state representatives most of whom are nothing more than political hacks with their hands out

6 - stop passing laws that make it more difficult to do business here - especially because it's politically correct - and by departments who have people that don't know what they are doing

7 - STOP THROWING MONEY AT SCHOOLS THAT WILL NEVER EDUCATE OUR CHILDREN BECAUSE THEY GO HOME TO AREAS THAT ARE FULL OF PROSTITUTION, DRUGS, MURDERS, DRUNKS AND FAMILIES THAT KNOW HOW TO WORK THE SYSTEM - and because politicians don't want to

WE DO HAVE SCHOOLS THAT TRAIN THE OLDER KIDS - THEY ARE CALLED "JAILS"

I can go on and on but

Jack Bass
