

Testimony for taxes. Ridiculous Connecticut Taxes are unfair to the citizens of this state. Retired folks and others are moving out of the state in record numbers. The senior citizens must pay for food or medicine, most do not take the full amount. My son has over twenty thousand dollars in college loans. Ct is mainly for the wealthy folks. The governor just doesn't get it. He is pushing industry and jobs out of Connecticut. I, myself and my family are moving to Florida when I retire. It's an affordable state for retired folks. There are more killings in the state more now than ever. The governor must stop tooting his own horn because Connecticut became the tax me state.
