

To whom it may concern

It is getting so that I can't afford to live in this state, and it seems as a Realtor that others feel the same way. There are more people selling their home or losing their home than are moving into the state. My grown children are having a hard time finding suitable employment. They are either underemployed or UN-employed.. We need to make some changes and get life more affordable. Please consider the residents of this state before you tax us any higher. We are the backbone that carries every community.
