

It is time for CT to have real leadership. The kind that realizes we cannot continue to support our current tax and spending plans we need to lead the country with the best standard of living as well as near the most affordable standard of living. for this to happen we need to put everybody to work. We need to cut or eliminate every tax to become the country's leader in cost of living. we need to cut spending in every department. We need to eliminate these overpaid governor appointed positions. You are spending our money not yours. It is time to act that way. We are tired of working more to pay your bills. we were promised shared sacrifices. The only one sacrificing is the taxpayer. State benefits have not kept pace with private sector declines, while state pay has out gained private sector pay. This cannot be supported. We need leadership that has the courage to correct this.
