I was unable to attend the Tax Panel Public Hearing on September 16. I am writing to urge the Tax Panel to promote progressive tax recommendations that strengthen Connecticut's Earned Income Tax Credit, modernize our sale's tax base, and reform the property tax base. The property tax structure needs to be reformed to alleviate opportunity disparities between municipalities.

We need in Connecticut reforms to the tax structure that make it easier for working people to make ends meet. The tax structure should provide equitable funding for children's education no matter where they live in the state.

We need progressive tax policies that invest in Connecticut's children and promote job creation.

I urge you to take steps that promote these reforms. There are many people in Connecticut that are under much stress because of current economic conditions in Connecticut.
