

My husband and I have lived in CT our entire lives. Our family is here. We are less than 10 years away from retirement and based on the taxation in this state, we are not planning to stay here. It just doesn't make sense to live in a State that will give us less disposable income once we are on a fixed income. It's like you want us to leave.

Why can't you live within your means like we do? Why do you insist on paying for things we can't afford? Why is being politically correct more important than the citizens of this state?

Unfortunately, I don't expect change. I expect more of the same. Maybe someday you will listen to those who voted you in.
