

It appears that those of you in the legislature have a never ending thirst for more money from tax payers. I have lived in CT. All my life (72yrs.) with the exception of three years of Service duty. I am now giving serious consideration to leaving the state due to the tax structure here. The last straw was your recent decision to levy an 8.8% tax on propane utilized for emergency power generators. I am convinced that you are all out of touch with those of us that have worked hard in order to enjoy a comfortable (not lavish) retirement. The well is dry folks.

Yours truly,

Ray Lebert
