

To Whom It May Concern:

Yes, the above subject line stands for Tax Enough Already. We in Connecticut have had enough with our incompetent "leaders" (read, Democrats), who place tax after tax on our backs and then crow about "surpluses", which is a cruel joke. Little wonder Connecticut receives an "F" grade from business surveyors. Little wonder people, especially the young, are leaving our state in droves.

Also, why do we have to endure a high state income tax, coupled with a high sales tax, with more onerous taxes to come on both individuals and businesses? I am in my seventies and cannot afford to live here any longer. My wife and I are in the process of looking for a condo in south Florida, where there is no state income tax and there are lower costs in every area of living. How many tens of thousands others will move out, as well? Don't the "leaders" ever get the message?

That was a rhetorical question. Connecticut is finished unless things change dramatically. Do it!
