

Greetings to all members of the State Tax panel,

I want to say that the annual Connecticut motor vehicle tax is just plain extortion! We pay tax at registration or point of purchase. For decades now Connecticut continues to steal this tax annually.

We the working class see very little for all the taxes we pay here in Connecticut.

Our secondary town roads are ruined with dumping tar coated stones on the surface instead of pavement, something which was banned from state roads years ago.

Cheap Band-Aids like Chip Seal takes away from the quality of life, and makes it much harder to keep the roads clean.

For the amount of motor vehicle tax we pay, Connecticut should have pristine roadways and sidewalks.

Many people continue to leave this “ Tax U To Death State of Connecticut” .

There are many places to live that do not tax the value of everything you own with a license plate.

I am hopeful that after the 2016 presidential election, we will ultimately rid our government of the incompetent leaders of our Country, and Make America Great Again!

Sincerely,

Nick D'Amico
