

I have spent most of my life in CT. where I run a family owned business that employees over 60+ people in CT. We also employ over 80+ people in Atlanta GA.

We are at a crossroads with our growth and we are considering strongly re-locating the entire business to GA. The state has made it really difficult to operate here in CT.

I hear the same argument from our employees. They cannot afford to live here.

Our un-sustainable approach to state retirement plans is and will choke us.

When will our elected officials realize that by not making the tough decisions now you will burden your grandchildren with a state budget that cannot be paid for without even further tax increase.

Fix the problem now or you will doom future citizens to move out of the state.

Regards,

Bill Patsiga
