A quick snapshot of Medicaid strategies for supporting people in using Medicaid . . .

**ASO Intensive Care Management**
- **Key goal:** Enabling individuals in development of health goals and improved outcomes
- **Who:** Individuals who risk stratify as high need based on CareAnalyzer results, referrals, self-referrals
- **What:** Care coordination; community care teams
- **How:** Nurse care managers in geographic teams, peer supports

**Home and Community-Based Waivers**
- **Key goal:** Diversion of individuals from institutional care
- **Who:** Individuals who have functional limitations that put them at risk of nursing home placement; by application
- **What:** Care coordination and LTSS services
- **How:** Care coordination through assigned care manager or self-direction; services provided by a range of providers

**Money Follows the Person**
- **Key goal:** Community integration
- **Who:** Individuals with need for LTSS who have been in a hospital or nursing home for three or more months; by application
- **What:** Transition assistance, funded by a federal grant for first year; state-funded housing vouchers
- **How:** Transition supports provided through assigned transition staff, services provided by a range of providers

**Community First Choice**
- **Key goal:** Enabling individuals to self-direct services within individual budgets
- **Who:** Individuals who are at nursing home level of care; by application
- **What:** Self-directed PCA and related services funded under Medicaid State Plan; support from fiscal intermediary
- **How:** Through self-direction

**Person Centered Medical Homes (PCMH)**
- **Key goal:** Supporting individuals in effectively using primary care
- **Who:** Individuals who select such practices for their care
- **What:** Limited embedded care coordination supported by enhanced Medicaid fee-for-service payments
- **How:** Practice elects the means of fulfilling this function

**Health Homes**
- **Key goal:** Integration of behavioral health care, medical care and social services
- **Who:** Individuals with serious and persistent mental illness served by LMHA, who have annual expenses in excess of $10,000; enrollment with provider from whom individual has received services, with opt-out
- **What:** Care coordination team funded by Medicaid per member per month payments
- **How:** multi-disciplinary team

**Medicaid Quality Improvement & Shared Savings Initiative (MQISPP)**
- **Key goal:** Clinical and community integration
- **Who:** Medicaid members other than those served by long-term services and supports; assignment based on retrospective examination of where individual has received care
- **What:** Care coordination funded by Medicaid supplemental payments to FQHCs; shared savings model
- **How:** primary care-based care team

**Community First Choice**
- **Key goal:** Enabling individuals to self-direct services within individual budgets
- **Who:** Individuals who are at nursing home level of care; by application
- **What:** Self-directed PCA and related services funded under Medicaid State Plan; support from fiscal intermediary
- **How:** Through self-direction
and the means by which we are enabling providers to support those people.

**Medicaid ASO Intensive Care Management**

**Key goal:** Support providers by enabling Medicaid members to identify goals, resolving access barriers, and sharing information

**Who:** Nurse care managers, organized in geographic teams

**What:** Development of care plans, support with missed appointments and connections among services

**Medicaid Person-Centered Medical Home Initiative (PCMH)**

**Key goal:** Support providers in practice transformation work that will enable improved access to and use of primary care and improved care coordination

**Who:** CHN-CT (Medicaid medical ASO) practice transformation team

**What:** Practices on the “glide path” to PCMH receive practice transformation coaching and enhanced payments; NCQA (Level 2 or 3) recognized practices receive ongoing coaching, are eligible for performance and improvement payments and enhanced payments

**Medicaid Quality Improvement & Shared Savings Initiative (MQISSP)**

**Key goal:** Support Federally Qualified Health Centers (FQHCs) and “advanced networks” in building on PCMH practice transformation work to include integration of care as well as linkages with community partners

**Who:** DSS

**What:** Selected entities are eligible for care coordination payments (FQHCs only) and shared savings (FQHCs and advanced networks)

**State Innovation Model Clinical & Community Integration Program (CCIP)**

**Key goal:** Support MQISSP participating FQHCs and “advanced networks” in developing clinical and community integration capabilities

**Who:** Practice transformation vendor contracted by State Innovation Model Project Management Office

**What:** Technical assistance toward supporting range of identified practice transformation capabilities

**State Innovation Model Advanced Medical Home (AMH) Glide Path**

**Key goal:** Support primary care practices that are not currently medical homes in practice transformation

**Who:** Practice transformation vendor contracted by State Innovation Model Project Management Office

**What:** Technical assistance in support of a range of medical home practice capabilities

**CMMI Practice Transformation Initiative**

**Key goal:** Support FQHCs in practice transformation work and assess impact on identified health measures

**Who:** Community Health Center Association of Connecticut

**What:** Technical assistance for enhanced care delivery, integration of services and data sharing
Overview of Practice Transformation Supports for Providers

Updated November 12, 2015 (Note: For programs not yet implemented, the descriptions below summarize the current status of proposals, which are subject to change).

<table>
<thead>
<tr>
<th>Person-Centered Medical Home Program (PCMH)</th>
<th>Advanced Medical Home Initiative (AMH)</th>
<th>Medicaid Quality Improvement and Shared Savings Initiative (MQISSP)</th>
<th>Clinical and Community Integration Program (CCIP)</th>
<th>Practice Transformation Network Grant (PTN)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Lead Entity</strong></td>
<td>State Innovation Model (SIM) Project Management Office (PMO) through contracted practice transformation vendors (Qualidigm and Planetree for AMH Vanguard pilot)</td>
<td>DSS</td>
<td>SIM PMO through contracted technical assistance vendor (to be determined)</td>
<td>Community Health Center Association of Connecticut (CHC-ACT)</td>
</tr>
<tr>
<td><strong>Goal</strong></td>
<td>The goal of the AMH Program is for primary care practices to achieve medical home standards while improving the primary care experience for patients and every member of the primary care team. Required medical home capabilities include providing patient-centered access; care coordination; cultural and linguistically appropriate services; and quality improvement.</td>
<td>While PCMH will remain the foundation of Medicaid care delivery transformation; and Intensive Care Management (ICM) will continue to be a resource to high need, high cost beneficiaries; MQISSP will incorporate new requirements related to integration of primary care and behavioral health care, as well as linkages to the types of community supports that can assist beneficiaries in utilizing their Medicaid benefits.</td>
<td>CCIP’s primary aims include more effectively integrating non-clinical community services into routine clinical care, methods for reducing health equity gaps in the management of chronic conditions, and improved identification of un-diagnosed behavioral health conditions with primary care treatment or referral and follow-up.</td>
<td>CT-PTN will build upon FQHC PCMH recognition to enhance team-based care delivery, integration of specialty/behavioral health with primary care, resource coordination and population health through training, technical assistance, data sharing and collaborative learning. CT-PTN will focus on improving health outcomes for three conditions common to health center patients: asthma, diabetes and hypertension.</td>
</tr>
</tbody>
</table>

- partnerships between individuals and their personal physicians
- a whole person approach to providing and coordinating care
- systematic performance of quality improvement activities with a focus on patient safety
- enhanced access to care through improved access,
<table>
<thead>
<tr>
<th><strong>Target Population</strong></th>
<th>Medicaid members</th>
<th>Medicaid and commercially covered individuals</th>
<th>Medicaid members</th>
<th>Although participation in MQISSP is an eligibility requirement, the CCIP programs will be focused on improving care for all patients, regardless of their payer</th>
<th>Individuals served by member FQHCs</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Current Status</strong></td>
<td>Over 100 practices currently participate, serving over one-third of Medicaid beneficiaries.</td>
<td>Initial cohort of 52 “Vanguard” practices launched September, 2015.</td>
<td>MQISSP is scheduled to be implemented effective January 1, 2017, pending a formal request for extension of time to this date.</td>
<td>CCIP is scheduled to be implemented 10/1/16.</td>
<td>Implementation (i.e. clinician commitment began 9/28/15); learning sessions will begin January 2016</td>
</tr>
</tbody>
</table>
| **Eligible Entities** | To be eligible for enhanced fee-for-service (FFS) as well as quality performance and improvement payments, a practice must 1) either be an independent private physician or nurse practitioner practice or a hospital-based outpatient clinic; and 2) be recognized by the National Committee for Quality Assurance (NCQA) as a “Level 2” or “Level 3” PCMH. | Practices that are:  
- not currently recognized under an existing national medical home standard including NCQA 2011 or 2014 (Practices that have NCQA 2008 are permitted to apply); and  
- have an established ONC-certified Electronic Health Record | FQHCs and “advanced networks” selected by Request for Proposal (MQISSP Participating Entities) | MQISSP Participating Entities can include:  
- a Federally Qualified Health Center, or  
- an “advanced network”, defined as: 1) One or more DSS PCMH program participants plus specialists (physical health, behavioral health and oral health providers); 2) One or more DSS PCMH program participants plus specialists and hospitals; or 3) A Medicare Accountable Care Organization (ACO) that includes a DSS PCMH | MQISSP Participating Entities |
|                       | Community Health Centers, Federally Qualified Health Centers (FQHC) and hospital-based clinics are eligible to participate in the PCMH Accreditation Program and to receive technical assistance. | | | | 13 CHCAct members active at the time of submission of the grant application plus two FQHCs approved in 2015 that became members in July 2015, for a total of 15 FQHCs. |
All participating practices must be enrolled as providers in the Connecticut Medical Assistance Program.

Key features of the proposed provider qualifications include the following:

- Participating entities must have a minimum of 2,500 attributed Medicaid beneficiaries
- Participating entities must include a current participant in the DSS PCMH program
- All providers in participating entities must be enrolled as Medicaid providers

DSS has also sought review and comment on proposed features of leadership and advisory structure (with a particular emphasis on consumer representation), as well as requirements for connections with a range of community providers.

<table>
<thead>
<tr>
<th>Means of Support</th>
<th>Free multi-disciplinary practice transformation team support convened by CHN-CT toward recognition by NCQA (all participating)</th>
<th>15-months of SIM-funded transformation services from Qualidigm and Planetree</th>
<th>Interactive learning collaborative, practice</th>
</tr>
</thead>
<tbody>
<tr>
<td>MQISSP Participating Entities will be eligible for technical assistance in developing new and advancing existing capabilities for improving care, especially for at-risk populations. The TA vendor will undertake a gap analysis to determine the appropriate level of technical support needed.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Member FQHCs will be eligible for technical assistance support (including such elements as the To Complete Performance Index Change Package; quality improvement methodologies and culture;</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Practices</td>
<td>Financial Incentives</td>
<td>Increased Incentives</td>
<td>Ongoing, Free Coaching</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>Joint Commission (includes FQHCs and hospital outpatient clinics) as PCMH</td>
<td>Enhanced fee-for-service payments for 18-24 months while practices are on the Glide Path working towards NCQA Recognition with a Community Practice Transformation Specialist (CPTS) (Please note: FQHCs are not eligible for these financial incentives)</td>
<td>Enhanced fee-for-service payments plus eligibility for performance and improvement incentives) when the practice is recognized as NCQA 2 or 3 PCMH</td>
<td>Coaching toward renewal of PCMH recognition</td>
</tr>
<tr>
<td>Coordination Elements</td>
<td>Elective Program Standards. CCIP will require participating entities to meet the core standards which include the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>-----------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| Coordination elements focus upon the following: | - Comprehensive Care Management  
- Health Equity Improvement  
- Behavioral health |
<p>| • Behavioral and physical health integration: Care coordinator training and experience, use of screening tools, use of psychiatric advance directives, use of Wellness Recovery Action Plans (WRAPs) | These core standards are designed to enhance competencies related to care management of individuals with complex needs with a focus on person-centered assessment; care plans that emphasize individual values, preferences and goals; the enhancement of the primary care teams with additional clinical and community participants; and linkages with community based services and supports. The standards also introduce processes to support continuous quality improvement aimed at reducing health equity gaps and a related intervention targeting hypertension, asthma, or diabetes. Community health workers play an important role in these standards, recognizing that community health workers can serve as a trusted partner and bridge to community services |
| • Culturally competent services: Training, expansion of the current use of CAHPS to include the Cultural Competency Item Set, incorporation of the National Standards for Culturally and Linguistically Appropriate Services (CLAS) standards | |
| • Care coordinator availability and education | |
| • Supports for children and youth with special health care needs: Advance care planning discussions and use of advance directives, incorporation of school-related information in the health assessment and health record (e.g. existence of IEP or 504) | |
| • Competence in providing services to individuals | |</p>

- **Asthma Emergency Department (ED)/Urgent Care Utilization Rate.**
  **Details:** This measure is used to assess the percent of patients who have had a visit to an (ED)/Urgent Care office for asthma in the past six months (NQMC 1615)

- **Asthma in Younger Adults Admission Rate.**
  **Details:** Admissions for pediatric asthma per 100,000 population (PQI #15)

- **Uncontrolled Diabetes Admission Rate.**
  **Details:** Admissions for a principal diagnosis of diabetes without mention of short-term complications per 100,000 population, ages 18 years and 18 years and older. (PQI #14)

- **Hypertension Admission Rate.**
  **Details:** Admissions with a principal diagnosis of hypertension per 100,000 population,
| Relationship to Medicaid ASO | CHN-CT (Medicaid medical ASO) provides practice transformation coaching, ongoing support, and pushes member data to participating practices. | AMH transformation vendor will coordinate with CHN-CT to enable practices that are participating in the AMH Glide Path to apply to participate in the Medicaid PCMH Glide Path. | CHN-CT will continue to support MQISSP Participating Entities with ICM supports for high need, high cost individuals (e.g. coordination of services, referrals, support in instances in which members miss appointments or experience access barriers) and data on patient panels. | CHN-CT supports will continue to be available to MQISSP participating entities. Care teams will coordinate with ICM care managers. Other criteria may be added. | CT-PTN members will continue to rely on CHN-CT CareAnalyzer for data analytics in support of serving Medicaid members. |

- Access during office hours for a medical question. **Details:** Data derived from the CAHPS on each FQHC participating in the PTN).
- Cost savings are based on an iterative expansion of care management interventions over four years.
