

Members of the Committee,

If the amount of officers are reduced, what would happen if a child went missing? Do citizens have the training and technology to locate abducted persons? A kidnapper can cut a child's hair and change their clothes, now with many in masks, how do you identify them? Inmates were released from prison as to prevent them from getting a virus. Children are more susceptible to abduction because of this.

Please, support our officers.

Thank you,

C. Marcella Kurowski
