

As a 7 year resident of Groton with 5 other locations in the U. S .(business related) my wife and I settled on Groton, Ct because it seemed like a community with a responsible citizenry and political representation Over the past 6 years we had occasion to call on our local police force for mostly minor infractions. However over the past few months, with the interference on the radical right, the Antefa movement and the interference of the Socialist/ Marxist group we no longer feel the same. Anyone with an understanding of history would know that any far left government first wants to remove our liberties. 2nd amendment rights, education choice, protection from the fed. govt. etc. Just look at North Korea, China, Russia etc. Please do not let this happen to my beloved country.
