

Hi my name is Kaitlynn I live in Trumbull Ct . I am half spanish and irish . The organization i belong to is KASA , PATH and DD council . The police have impact my life because my aunts fiance is a police chife . I have one sugestin police should do is tell people they have taser and gun befor they do anything because some people with disabilitys get scared . I have on concern is if someone with a heart condition gets tasered . you should tell the police you have a medical condittin before they taser you . My other concern is guns and there has been a lot of gun violance . I was wondering how police can stop this from happening . My sugestion about an identifications card would be very helpful for me and my friends who have disabilities because it can help the police know you have a disability . My experiance with police have been wonderfull . I know a police chief and a police captin . I ask them questions all the time and what they do during the day at the police station . I am gratefull to know them both .

i would like my name labeld for the testimoney .
