

To whom it may
concern,

I never thought I would have to worry about having a police officer come if I needed one and now I see that we might have to defend ourselves. If you tie the hands of our Police you will have nothing to help us with we need them for our protection and to show a present in all neighborhoods to let us hard working and Senior citizens and everyday people that need them. I cannot for a moment think what will happen if you defund the people we need . I understand that there is bad in everything but you can't leave us helpless which is what you are trying to do to fend for ourselves that frightens me to death. I have nothing but respect for our Police and fire departments. So please really think about what you are doing without the police we will have to defend ourselves and I will if I have to because Bill HB6004 leaves us no alternative So please do not pass this bill and abandon us which is what you will do

Please

Thank you for your consideration and
respect
