#### Background

Next Generation Connecticut is an initiative that includes the following:

- Increasing total enrollment by 6,580 (30%). Of those, almost 3,300 would be STEM students, including 70% more engineering students. About 5,000 of the students would be enrolled at the Storrs campus, and about 1,500 would attend UConn in Stamford.
- Revolutionizing STEM infrastructure at the Storrs campus by building facilities to house materials science, physics, biology, engineering, cognitive science, genomics studies, labs, and related disciplines. Aging infrastructure would also be updated to accommodate new faculty and students.
- Creating the nation's premier STEM honors program, including a residential living community in which those students can share their experiences, innovative ideas, and camaraderie beyond the classrooms and labs in which they will study.
- Relocating the Greater Hartford campus to downtown Hartford, and increasing digital media and risk management degrees at UConn-Stamford, where student housing would also be built.
- Hiring 259 new faculty members in addition to the 290 already in the current faculty hiring plan. Of the 259 additional new faculty hires, 200 would be dedicated specifically to STEM programs. This would be on top of the 175 STEM-specific faculty members already being hired under the previously announced faculty hiring plan.
