45% - 100%
NA

Notes: Some health center locations may overlap due to scale, and a few locations may not be visible when mapped. An estimated 10% of health centers nationwide do not receive federal funding. State maps may include non-federally funded health center sites as well as newly funded health centers as of August 2008, but patient numbers only reflect patients served by federally funded health centers.

* Congressional District boundaries are as of the 110th Congress.
** Low income represents under 200% of FPL.
