Re: Columbia Low Back Toilet Support

Date: June 16, 2000
Revised: October 19, 2008

Description:
The Columbia Low Back Toilet Support is a plastic low back support that prevents the patient from sitting back too far on the toilet seat and rubbing their back against toilet fixtures.

Indications:
Obese neurologically impaired individuals or individuals with limited physical capabilities especially sitting balance may benefit from added back support when sitting on the toilet.

Precautions:
Frequently check that all-locking knobs and parts are tight.

Procedure:

1.) Installation as per manual instructions.
2.) Transfer patient to toilet using stand-pivot or other transfer method.
3.) Have patient slowly lean against back support.
4.) Back support may be raised or lowered to increase comfort level of individual patient.
5.) Return to W/C with stand-pivot or other transfer method.
6.) When not in use, support back may be removed.

Cleaning:
Clean as per Hospital Procedure being careful to clean between chrome support piece and porcelain toilet back. Always keep the chrome parts dry to prevent deterioration of the finish.
