FISCAL IMPACT STATEMENT - BILL NUMBER sSB 28

STATE IMPACT	Potential Savings, see explanation below
MUNICIPAL IMPACT	Potential Savings, see explanation below
STATE AGENCY(S)	Office of the Secretary of the State

EXPLANATION OF ESTIMATES:

STATE IMPACT: To the extent that combining voting districts reduces the amount of voting materials which the Secretary of the State must distribute, some savings could result. Since the degree of the savings is contingent upon the number of voting districts that are combined, the exact amount of the savings, if any, cannot be determined at this time.

MUNICIPAL IMPACT: Since the bill would reduce the hours during which the polls must be open, some savings are expected to result for municipalities. The extent of the savings is indeterminate as it is contingent upon the specific hourly expenses of a municipality. Generally, municipal savings are expected to be approximately 43% of the personnel costs that are associated with conducting the Presidential Preference Primary.

To the extent that a municipality is able to use volunteer poll workers and combine polling places, additional savings are also expected to result, the amount of which is uncertain at this time.
